# Assembly Instructions For Fremont Ganging Brackets

**Tools required:** Phillips head screwdriver.

**Note:** These instructions are intended for various models and configurations. Your products may not look exactly as those shown in the diagrams.

**Important:** The assembly process requires that some hardware be kept loose until later in the sequence. Follow these instructions closely to ensure correct assembly.

**Recommendation:** Retighten all screws on a seasonal basis to ensure your product remains strong and stable for many years of use.

1. Assemble all chairs according to their respective instruction sheets.
2. For In-Line arrangements, lay all components on their backs on a soft clean surface, as shown in figure 1.
3. Slide components tightly together. Be sure all edges are in alignment.
4. Fit ganging brackets over adjacent edges and press brackets firmly into place, also as shown in figure 1.
5. Double-check that edges of all components are still in alignment and then insert phillips screws through brackets into plywood, also as shown in figure 1. Tighten screws securely using care not to strip.
6. Carefully return assembly to upright position. This will require 2 or more persons. Use care to avoid putting stress on gang brackets.
7. For Right-Angle arrangements, gang bracket attachment must be done with the components in the upright position, as shown in figure 2. This requires the assembler to reach up from underneath to place brackets in the correct positions and insert screws.
8. Your product is now assembled and ready to use.

### In-Line Arrangements

### Right-Angle Arrangements

**Caution:** Use care when lifting and moving assemblies to avoid putting stress on gang bracket screws.

**Important Note:** Ganging brackets are designed to connect tables to the armless side of chairs, loveseats and sofas. It is not possible to connect a table to the arm of any guest chair, loveseat or sofa.

Thank you for purchasing a Lesro product.
